Updating New Firmware
on CV-RCP-**V2**

Updating new firmware versions to the Marshall **CV-RCP-V2** unit requires a USB Memory Stick

Please follow the instructions listed below to update new firmware on the CV-RCP-V2 unit (USB memory stick is required to perform update):

1. **Obtain a "FAT" formatted USB memory stick.**

2. **Plug USB memory stick into USB port on your laptop or computer.**

3. **Download latest firmware ".tar" file (IURCP3.tar *for example*) onto your Memory Stick. Make sure the file is by itself outside of a folder.**

4. **Insert USB memory stick into the USB port on top of CV-RCP-V2.**

5. **A prompt will appear "*A software update has been detected. Would you like to install it now*?"**

6. **Push the GREEN Update button on screen.**

7. **CV-RCP-V2 will load in new firmware and normal operation will appear.**

Latest CV-RCP-V2 firmware will enable control of all current and new camera models, as well as improved levels of adjustment and control.

If you have any questions or concerns, please don't hesitate to call 310-333-0606 and ask for Technical Support.
